

Air1 radio station is one of the most popular radio stations in our local community, as it serves both youth and adults. Having a commercial-free radio station that broadcasts the national weather bureau severe weather warnings is critical, as we are subject to severe weather at times. It also serves the purpose of providing wholesome Christian rock music for the young people (and us oldies, too!). If Air1 was displaced by an LPFM broadcaster, a great community asset would be lost. There are so many other broadcasters already on the airwaves; Air1 serves a unique public need, and would be sorely missed if displaced.
